

Veer Mallu Panchumarthi

SENIOR AI ENGINEER

veeramallu67@gmail.com +91 90308 74030 Hyderabad, India

SUMMARY

Senior AI Engineer with 5+ years of experience building production-ready products across machine learning, deep learning, LLMs, RAG, agentic workflows, NLP, and computer vision. Focused on turning promising models into clear APIs, resilient workflows, and cloud systems that teams can trust — useful, observable, and dependable in production.

EXPERIENCE

Senior AI Engineer — Ford Global Technology & Business Center 2025 – PRESENT

Payroll: iKomet Technology Solutions Pvt. Ltd.

- Developing AI-powered document classification and information extraction pipelines for large-scale processing.
- Designing scalable FastAPI services for model inference and asynchronous workflows with Google Cloud Pub/Sub.
- Deploying production AI applications with Cloud Run and Docker.

Machine Learning Engineer — Cloudstorm Software Pvt. Ltd. 2023 – 2025

- Implemented computer vision models for malaria detection using convolutional neural networks.
- Developed prediction and classification pipelines, including feature engineering and model optimization.
- Built REST APIs for ML model deployment.

Software Engineer — 63 Moons Technologies Ltd. 2021 – 2023

- Built NLP applications for text classification and sentiment analysis.
- Developed emotion-classification models and optimized ML models for production.
- Created internal REST APIs for machine-learning inference.

SELECTED PROJECTS

- **Enterprise Document Intelligence Platform** — RAG-based ingestion, classification, metadata extraction, vector retrieval, and contextual generation in a cloud-native architecture (GCP, FastAPI).
- **Malaria Detection using CNN** — computer vision pipeline classifying microscopic blood-cell imagery, with preprocessing, augmentation, training, and model optimization.
- **Language & Emotion Intelligence** — NLP for text classification, sentiment analysis, and emotion classification, delivered through production REST APIs.

TECHNICAL SKILLS

Intelligent systems: Generative AI, Agentic AI, AI agents, Multi-agent systems, RAG, Transformers, MCP

Models & data: NLP, Computer vision, ANN, CNN, RNN, LSTM, Feature engineering, Data preprocessing

Application layer: Python, FastAPI, LangChain, LangGraph, OpenAI, Gemini, Model evaluation pipelines

Cloud & delivery: GCP, GCS, Pub/Sub, Cloud Run, Docker, Kubernetes, MLflow, Tekton, DevSecOps

EDUCATION

Master of Computer Applications

Central University of Haryana · 2017–2020

Bachelor of Science

Acharya Nagarjuna University · 2014–2017
